

# JCMOVES Dual Token System Blueprint

## System Overview

This system uses a dual-token structure designed for stability, growth, and real-world utility within the JC ON THE MOVE platform.

### Token 1: JCMOVES USD (Stable Layer)

JCMOVES USD is an internal service credit pegged to \$1.00 and used for all pricing and transactions within the platform.

- 1 1 JCMOVES USD = \$1.00
- 2 Used for booking services and payments
- 3 Minted only after real payments are received
- 4 Burned when spent on services
- 5 Not publicly traded at launch

### Token 2: JCMOVES (Reward Layer)

JCMOVES is the ecosystem token used for rewards, staking, incentives, and engagement.

- 1 Earned through bookings, referrals, and work
- 2 Used for staking and unlocking perks
- 3 Used for jackpot entries and bonuses
- 4 Variable market value
- 5 Drives user engagement and loyalty

## How the System Works

- 1 Customer books a service and pays \$200
- 2 System credits 200 JCMOVES USD
- 3 System rewards customer with JCMOVES tokens
- 4 User can spend USD credits or stake JCMOVES
- 5 Treasury holds real revenue backing

## **Staking System**

- 1 25,000 JCMOVES = 5% discount or bonus
- 2 100,000 JCMOVES = 10% discount or bonus
- 3 Applies to both customers and workers
- 4 Unlocks perks, not guaranteed income

## **Treasury Model**

- 1 Revenue is collected from real-world services
- 2 Portion allocated to rewards and ecosystem growth
- 3 Supports JCMOVES value through utility
- 4 Maintains backing for JCMOVES USD

## **Compliance Approach**

- 1 JCMOVES USD treated as internal service credit
- 2 JCMOVES treated as utility/reward token
- 3 No guaranteed returns or dividends promised
- 4 Rewards tied to platform usage and participation

## **Key Advantages**

- 1 Stable pricing with USD layer
- 2 Growth potential with JCMOVES token
- 3 Real-world revenue backing
- 4 Scalable ecosystem design
- 5 Strong customer and worker incentives

## **Final Vision**

The JCMOVES ecosystem connects real-world services with digital rewards, creating a powerful system where customers save money, workers earn more, and the platform grows sustainably.
