

JCMOVES MASTER SYSTEM

Full Ecosystem: Rewards • Redemption • Treasury • Growth Engine

1. System Overview

JCMOVES is a dual-purpose ecosystem combining real-world service revenue with a tokenized rewards engine. Customers earn tokens through services and redeem them for discounts, creating a closed-loop economy.

2. Core Token Economics

Earn Rate: 15 JCMOVES per \$1 spent
Redemption Rate: 500 JCMOVES = \$1
Average Return: ~3% cashback equivalent

3. Redemption Rules

- Minimum: 500 tokens (\$1)
- Max per job: 20% of subtotal
- Applies to service subtotal only
- Rounded in 500 token increments

4. Backend Logic (Core)

```
export const CONFIG = {
  earnRate: 15,
  redeemRate: 500,
  minRedeem: 500,
  maxPercent: 0.2
};

function calculateEarn(subtotal) {
  return Math.floor(subtotal * CONFIG.earnRate);
}

function redeem(tokens) {
  return tokens / CONFIG.redeemRate;
}
```

5. User Experience Flow

1. Customer books service
2. Earns JCMOVES tokens
3. Returns to apply tokens
4. Sees instant discount at checkout
5. Repeats cycle → retention loop

6. Treasury System

Revenue feeds treasury wallet: • 40% buybacks • 30% staking rewards • 20% jackpot • 10% liquidity

7. Growth Flywheel

Services → Revenue → Token Rewards → Retention → More Bookings → Treasury Growth

8. Monetization Layers

- Core services (moving, junk removal)
- Subscription services (trash valet)
- Token marketplace
- Lottery system
- Staking rewards

9. Compliance Structure

- Tokens are rewards, not securities
- Fixed redemption rate internally
- No guaranteed profit claims
- Clear separation from investment products

10. Final Vision

JCMOVES becomes a service-powered digital economy where: • Customers earn by spending • Workers earn by working • Treasury grows from real revenue • Tokens fuel engagement and retention
