

JCMOVES FINAL MASTER DECK

Service-Powered Digital Economy • Rewards • Staking • Treasury • Growth Engine

Vision

Build a service-backed digital economy where customers earn rewards from real-world services, redeem them for discounts, and participate in a community staking system powered by actual revenue.

System Overview

JCMOVES integrates four core systems:

- Rewards Engine (earn tokens from services)
- Redemption Engine (tokens → service discounts)
- Staking Engine (individual + community pool)
- Treasury Engine (revenue → growth flywheel)

Rewards System

Earn Rate: 15 JCMOVES per \$1 spent
Purpose: Drive repeat usage and retention

Redemption System

500 JCMOVES = \$1.00 service credit
Max: 20% of job subtotal
Minimum: 500 tokens

Staking System

Hybrid model combining individual staking perks and a community revenue pool.

- +10% earnings boost
- Tier-based discounts
- Monthly pool distributions
- VIP perks for top stakers

Staking Tiers

Stake Amount	Benefit
25,000	5% discount
100,000	10% discount
250,000	15% discount
1,000,000+	VIP perks

Treasury System

Revenue allocation example:

- 40% buybacks
- 30% staking pool
- 20% jackpot
- 10% liquidity

Growth Flywheel

Services → Revenue → Treasury → Rewards → Retention → More Bookings → Growth

User Experience

Simple messaging:

“Earn JCMOVES when you book”

“Use tokens for discounts”

“Stake to unlock perks”

Compliance

- No guaranteed returns
- Rewards tied to service usage
- Fixed internal redemption value
- Clear separation from market speculation

Technical Architecture

Stack: Next.js • Express • Drizzle • Postgres

Rewards → Ledger → Balance
Redemption → Validation → Apply
Staking → Pool → Distribution
Treasury → Allocation → Growth

Final Positioning

JCMOVES is not just a token — it is a service-powered economy designed for real-world scalability.
